**Re: Underground Storage Tank/Mrs. Louise Falk's Property  
609 Woodland Drive, Greensboro, North Carolina**

Dear Mr. Salley:

This letter follows up on my earlier letter dated March 24. We have retained Berico Fuels, Inc., to remove the tank. Berico will obtain the proper permit from the Guilford County Environmental Health Department and will schedule the removal for approximately 30 days after issuance of the permit. The tank will be pumped dry, removed, labeled properly and disposed of. Contaminated soil will be removed to a depth of approximately 10 to 12 feet, and soil samples will be taken from the excavation at specific locations to be determined in coordination with the Guilford County Environmental Health inspector who will be present at the time of the removal. Soil samples will be analyzed by Guilford Laboratories to confirm that all contaminated soil has been removed. After the analyses are complete, the hole will be filled with clean backfill, and the yard will be restored to its original condition.

We will provide you with a report after the soil sampling and analyses are complete. Meanwhile, if you have any questions or comments, please contact me at 373-1300 or Steve Earp at 378-5314.

Very truly yours,

Herbert S. Falk, Jr.

cc: Mrs. Louise D. Falk
